

Marketing Funnel & Conversion Performance Analysis Report

Prepared By: Keerthi Priya Sankana

Role: Data Analytics Intern

Project: Marketing Funnel & Conversion Performance Analysis

Tools Used: Python | Google Colab | Pandas | NumPy | Matplotlib | Seaborn | GitHub

Submission Date: June 2026

1. Executive Summary

This project focuses on analyzing a bank marketing campaign dataset to evaluate customer conversion performance and identify factors influencing subscription success. The analysis examines marketing funnel performance, contact channel effectiveness, campaign frequency impact, customer demographics, and occupation-based conversion patterns. The findings provide actionable insights to optimize future marketing campaigns and improve conversion rates.

2. Project Objective

The primary objective of this project is to analyze customer conversion behavior and identify the key drivers of successful marketing outcomes. The analysis aims to support data-driven decision-making and improve campaign effectiveness through targeted customer engagement strategies.

3. Dataset Overview

Dataset Name: Bank Marketing Dataset

Source: Kaggle

Dataset Description: The dataset contains customer information and campaign interaction records used to predict whether a customer subscribes to a term deposit after marketing outreach.

Key Attributes: Age | Job | Marital Status | Education | Contact Channel | Campaign
Contacts | Previous Outcome | Subscription Status

4. Methodology

Data Cleaning

- Loaded the dataset into Google Colab.
- Checked for missing values and duplicate records.
- Processed categorical variables for analysis.
- Prepared the dataset for visualization.

Exploratory Data Analysis

- Analyzed overall conversion performance.
- Examined customer movement through the marketing funnel.
- Evaluated contact channel effectiveness.

- Investigated campaign frequency impact.
- Compared conversion rates across occupations.
- Analyzed age-group conversion trends.

Data Visualization

The following visualizations were created:

- Marketing Funnel Analysis
- Conversion Rate by Contact Channel
- Campaign Contacts vs Conversion
- Conversion Rate by Job
- Conversion by Age Group

5. Analysis Results

Marketing Funnel Analysis: The funnel analysis reveals customer progression from initial contact to final subscription. A noticeable decline is observed between outreach and conversion stages, highlighting opportunities to improve customer engagement.

Contact Channel Performance Analysis : Different communication channels produced varying conversion rates. Certain channels demonstrated stronger customer response and higher subscription success.

Campaign Frequency Analysis : The relationship between campaign contacts and conversions indicates that moderate follow-up efforts improve conversion rates, while excessive contact may reduce effectiveness.

Job Category Analysis : Customer occupation significantly influences subscription behavior. Certain job categories exhibit higher conversion rates compared to others.

Age Group Analysis : Conversion rates vary across age segments. Middle-aged customers demonstrate stronger engagement and higher subscription likelihood.

6. Key Findings

1. Significant customer drop-offs occur after the initial contact stage.
2. Contact channel selection has a strong impact on conversion success.

3. Excessive campaign contacts may reduce customer responsiveness.
4. Conversion rates vary considerably across occupational groups.
5. Middle-aged customers represent the highest-converting demographic segment.

7. Business Recommendations

Recommendation 1: Improve Funnel Conversion

Implement personalized follow-up strategies to reduce customer drop-offs and improve conversion rates.

Recommendation 2: Focus on Effective Contact Channels

Prioritize communication channels that consistently generate higher conversion performance.

Recommendation 3: Optimize Campaign Frequency

Maintain an optimal number of customer contacts to maximize engagement while avoiding campaign fatigue.

Recommendation 4: Target High-Converting Occupations

Develop specialized marketing campaigns for occupational groups with strong subscription rates.

Recommendation 5: Utilize Demographic Segmentation

Design age-specific marketing strategies to improve customer engagement and campaign effectiveness.

8. Conclusion

The Marketing Funnel & Conversion Performance Analysis project successfully identified key factors influencing customer subscription behavior. The findings demonstrate how marketing analytics can support informed decision-making, improve campaign efficiency, and increase conversion performance. By leveraging these insights, organizations can optimize customer targeting strategies and maximize marketing return on investment.

Deliverables

- ✓ Marketing Funnel Dashboard
- ✓ Conversion Performance Analysis Report
- ✓ Google Colab Notebook
- ✓ Business Insights & Recommendations
- ✓ GitHub Repository Documentation
- ✓ Data Visualizations and Charts
- ✓ Marketing Strategy Recommendations
